

Tate & Lyle offers new natural flavour solution

15 May 2019 | News | By Manbeena Chawla

ZOLESSE™ Natural Flavour Features Clean Label, Optimized Cost, and Sugar and Stevia Synergy

Sweet Green Fields (SGF), one of the largest fully integrated global stevia ingredient companies, and Tate & Lyle PLC (Tate & Lyle), a leading global provider of food and beverage solutions and ingredients, build on the two companies' industry-leading track record of new product innovation with the introduction of ZOLESSE™ Natural Flavour.

ZOLESSE™, a new natural flavour (per FDA definition), supports an effort to help food and beverage manufacturers deliver great-tasting products that meet ever-growing consumer demand for clean label ingredients, all at an optimized cost compared to alternatives.

Non-GMO Project Verified ZOLESSE™ is a glycosylated stevia extract that labels as natural flavor, enabling manufacturers to keep a short ingredients list.

ZOLESSE™ Natural Flavor also has a great synergy with other stevia products; and when used together, ZOLESSE™ helps reduce bitterness, lingering and provides a more sugar-like taste. In addition to working well with stevia, ZOLESSE™ can also be used with monk fruit extract and sugar, enhancing sweetness intensity.
