Increases its production capacity for pea and faba bean concentrates

The Netherlands based Herba Ingredients opens a new state of the art production line for protein and starch concentrates.

With this new production line Herba Ingredients increases its production capacity for their pea and faba bean concentrates and also expands on their pulse flours portfolio.

Located in the heart of Europe Herba Ingredients is the ideal partner for the efficient supply of all types of plant based protein and starch ingredients, offering a range from different powder solutions, precooked and deodorized solutions and textured ingredients.

With this new setup Herba Ingredients is one of the few pulse ingredient companies that controls the complete supply chain, from the field to high value ingredients.
