The machine, priced at Rs 15000, holds the capability to retain all the natural and original taste and nutrients

KENT has launched Cold Pressed Juicer that employs a low speed squeezing technique, which not only retains the natural and original taste, but also the nutrients, making the juice healthier and tastier. Fluid, fruity and refreshing - juices are the best way to get raw liquid nutrients into the body.

Indeed, nothing beats the taste of a chilled glass of juice so we help you find a juicer that is worth your dime, grates fruits and greens quickly and runs smoothly. It has Low RPM juicer that helps retain nutrients and fibre. Go on; squeeze juice and fruits into your diet with top Kent Cold Pressed Juicer!

The machine, priced at Rs 15000, holds the capability to retain all the natural and original taste and nutrients as well that would make the juice healthier and tastier.

Speaking about the product Dr. Mahesh Gupta chairman Kent Ro said “As summer is here and most of the people are at home due to pandemic, so juicers are the most essential kitchen appliance as they provide a convenient way of consuming nutritious fruits & vegetables without taking too much time. So keeping in mind the motto of Kent Ro we have designed Kent Cold pressed juicer which produces more fresh & pure juices than any other conventional juicer. While designing this cold press juicer we had made sure features like non-skid feet and smooth sieve result in effortless juicing as well as a comfortable cleaning experience."
