Launches 4 new variants of supplements

Mumbai based firm Nutrova has launched 4 new variants of supplements namely Nutrova Collagen Peptides, Nutrova Fish Oil, Nutrova Formula O and Nutrova Formula V.

While Nutrova Collagen Peptides is a high-quality poultry-origin collagen supplement that can be used flexibly, in either a 5-gram or 10-gram dose, depending on your requirements; Nutrova Fish Oil is highly pure form of fish oil, which provides high concentrations of omega-3 fats (especially EPA and DHA) in a smaller-sized capsule.

Adding on, Nutrova Formula O is a multivitamin designed specifically for standard Indian diets that include meat and/or dairy; and Nutrova Formula V is a multivitamin designed specifically for vegan diets/vegetarians who don't consume a lot of dairy.

Nutrova formulates and develops its products, with partner facility called Vital Neutraceuticals, manufacturing them just outside Mumbai, in a city called Ambernath.

"There's every reason to start paying attention to the powerful nutrients in the food we eat- not only to maintain our overall health and functioning, but to even optimise specific aspects of our health", said Akshay Pai, Founder and CEO, Nutrova
