Makes new addition to its wide range of all-natural breakfast cereals and health foods, including muesli, oats, bran

New Delhi based Bagrry’s India has added six new nutrition packed seeds to its selects and organics range that now includes protein packed Flax seeds along with Quinoa & Chia seeds. The new Selects range comprises Pumpkin, Sunflower and Watermelon seeds all available in stand-up pouch packs.

The 100% organic, vegan and gluten-free Flax seeds are rich in protein, fibre and omega-3 fatty acids, whereas calcium and antioxidants-rich Chia seeds and the protein-rich super grain Quinoa are the other two seeds in the Organics range.

Pumpkin seeds are loaded with good fats, proteins and micronutrients. They are 100% natural and gluten free. The Sunflower seeds are rich in fibre and protein and offer anti-bacterial and anti-fungal benefits. The low-calorie, vegan Watermelon seeds is a natural immunity booster and enhance bone density.
