**The new 169,000 square foot addition will produce Kinder Bueno products for the North American market**

Ferrero North America, part of the global confectionery company Ferrero Group, has announced plans to invest up to $214.4 million to expand its chocolate processing and product

manufacturing plant in Bloomington, Illinois, US.

The 169,000 square foot addition will be dedicated to producing Kinder Bueno, a popular Ferrero premium chocolate bar in Europe that launched in the US in 2019. Construction of the expansion is projected to start by Fall 2022 and is anticipated to create up to 200 new jobs over a four-year period. The new expansion will be one of the largest production lines built by Ferrero outside of Europe. The new facility is set to open in 2024.

The announcement comes months after Ferrero broke ground on a chocolate processing facility at the same location, which is set to begin operating in 2023.
