The company will develop and produce premixes for human nutrition applications

Thane-based Fermenta Biotech, announced the inauguration of its premix plant in Kullu, Himachal Pradesh. The Company can offer tailor-made premixes for industries including staple food fortification, dietary supplements, Ready To Use Therapeutic Food (RUTF) and Ready To Use Supplementary Food (RUSF) as well as bakery and confectionery, beverages and health food drinks.

Fermenta’s plant, dedicated to the manufacture of customised premixes, possesses FSSAI license and can cater to both powder and liquid premix requirements. The premix plant is backed by technical expertise from Fermenta’s formulation development lab in Thane, Maharashtra, and possesses all necessary infrastructure to ensure uniformity and consistency of the products. Leveraging its experience and strengths in Vitamin D, Fermenta will source its ingredients for premixes in a sustainable and reliable manner.

The inauguration of the premix facility marks a milestone in Fermenta’s goals to add offerings to its emerging portfolio of nutrition.
