On2Cook has also been included in the Forbes DGEMS 2023 list among 200 select companies with global business potential

The world’s fastest cooking device On2Cook, an invention that could bring about profound changes in the cooking industry, has been adjudged the ‘Best Emerging Food Tech of the Year’. The invention by Sanandan Sudhir, which has created waves at multiple international events and was endorsed by hundreds of chefs and culinary experts globally, bagged the honour at the prestigious Food Connoisseurs India Awards - South India Edition 2023, the most influential business-to-business F&B event presided over by changemakers and top leaders in the HoReCa space.

“On2Cook is an invention with the potential to completely transform the food industry, as much as life in a normal household. This award is dedicated to the whole On2Cook team, for its passion, creativity and dedication to excellence. We are elated that the AI-based combination cooking appliance is already disrupting the food-tech and cooking segments, and we cannot wait to transform every kitchen around the globe,” said Sanandan Sudhir On2Cook inventor expressing his happiness on the remarkable feat.

Notably, On2Cook has also been included in the Forbes DGEMS 2023 list among 200 select companies with global business potential. Speaking about the same, Sanandan added that he envisions On2Cook as India’s gift to the world and such stepping stones are always a shot in the arm for us.
