Circus Group signed a preliminary agreement with Germany’s capital airport Berlin Brandenburg to gain experience with the group's autonomous food supply system

Circus SE, a leading AI robotics company specialising in autonomous kitchen systems, and Flughafen Berlin Brandenburg GmbH (FBB) have signed a preliminary agreement to launch the group’s autonomous food supply system for employees at the Berlin Brandenburg Airport (BER).

Circus is a pioneer in AI-powered robotics that is building a global infrastructure of autonomous kitchens aiming to disrupt the global foodservice market through advanced AI, robotics, and proprietary software solutions. The proprietary developed autonomous food production robot CA-1 can deliver up to 2,000 freshly prepared meals per day without any humans involved while occupying only 20 square meters of space. With its technology stack, Circus develops solutions to ensure seamless and hygienic catering for everyone.

Flughafen Berlin Brandenburg GmbH operates the BER Airport, the third largest airport location in Germany. The initial agreement includes the deployment of the CA-1 Robot by Circus to cover a share of the daily employee catering at the BER Airport in parallel with regular operations.
