As a part of the initiative Vitonnix UK in phase 1 has contributed 20,000 bottles worth Rs1 crore of its flagship product

The SEARCH Foundation, known for its transformative healthcare efforts in rural India, has announced a significant partnership with Vitonnix UK, a global leader in health and wellness innovations. As a part of the initiative Vitonnix UK in phase 1 has contributed 20,000 bottles worth Rs1 crore of its flagship product, Vitamin D Sublispray, to support the health and well-being of underserved communities in Rural India. This significant donation aligns with Vitonnix's mission to make effective and innovative health solutions accessible to the masses of India.

Vitonnix UK is revolutionising the vitamin supplement industry with its groundbreaking Sublispray technology, delivering vitamins and essential nutrients directly through the bloodstream via a sublingual spray. This innovative method bypasses the digestive system, ensuring rapid, effective nutrient absorption and offering a convenient alternative to traditional pills. By avoiding the gastric route, Sublispray preserves sensitive ingredients and essential micronutrients, making it a powerful foundation for optimal health.

Vitamin D is crucial for the body's absorption of calcium, magnesium, and phosphate, key minerals for maintaining bone health. Recent studies indicate that nearly 70 per cent of Indians are deficient in this vital nutrient, Vitonnix Sublispray offers a timely and effective solution. It's especially beneficial for individuals who struggle with swallowing pills or experience pill fatigue from daily supplements, providing an accessible, effective and user-friendly way to support overall Wellness. Additionally, this innovative spray is available in a variety of great-tasting flavours, making it an appealing choice for individuals of all ages and health conditions.
