Set to increase its footprint in Tier II cities in Telangana, Karnataka, Tamil Nadu and Maharashtra

QSR momo and bao brand, Zomoz has raised Rs 5 Cr co-led by The Chennai Angels and Hyderabad Angels to increase its footprint in Tier II cities in Telangana, Karnataka, Tamil Nadu and Maharashtra. A few HNIs have also participated in the round. The brand currently operates 72 outlets in these four states and is rated the highest among its competitors.

The funds raised will primarily be used to increase the outlet count to 100 within the next three quarters. Bolstered by robust unit economics and a very asset-light model, Zomoz has also turned profitable and aims to achieve its target of 100 outlets while maintaining profitability.

“We are raising just enough to ensure we don’t burn irresponsibly while scaling up and that means leveraging technology wherever possible to keep operations lean. A striking example of that is going to be our pilot project of using bots to deploy our patented momos in a minute. I feel that can fundamentally change consumption in this category,” said Shouvik Dhar, Co-Founder, Zomoz.

Investment Director from The Chennai Angels, Chandu Nair said, "We at The Chennai Angels (TCA) are excited to back Zomoz, a brand that is redefining the momo category with a powerful combination of technology, scalability, and consumer love. Zomoz stands out with its patented automated manufacturing, strong customer ratings across 70+ locations, and strategic backing from Rebel Foods. We believe Zomoz is uniquely positioned to lead the next phase of growth in this space. We’re proud to support their journey and look forward to their continued success."

The chairman of the Hyderabad Angels, Pradeep Dhobale said, "Our decision to invest in Zomoz was made after visiting their factory in Hyderabad. We were impressed by the innovative technology deployed, hospital-grade hygiene and cleanliness, and the presence of a well-trained, enthusiastic team with a sharp focus on quality."
