

BestSource Nutrition launches vegetarian flaxseed oil capsules

26 July 2019 | News | By Manbeena Chawla

First time in India 100% vegetarian Flaxseed with Tocopherol Capsules

Mumbai based health & nutrition supplement company BestSource Nutrition has announced the launch of 100% vegetarian Flaxseed with Tocopherol Capsules. Flaxseed Oil is a high source of Omega 3 fatty acids. Omega 3 are known as “good fats” for heart, skin and joint health, mostly missing in regular Indian diet, especially for vegetarians. BestSource Nutrition’s Flaxseed oil capsules comes along with natural Vitamin E (tocopherol), that makes it even more suitable to manage heart, skin and hair health.

"FSSAI has come hard on the practice of mentioning Green mark on the Food Products even when they contain Gelatine Capsule Shell or some other animal origin excipients. So far, it was difficult to pack liquid content in a capsule which is not animal origin. BestSource Nutrition for the first time in India has introduced 100% vegetarian Flaxseed with Tocopherol Capsules using special technology for liquid filled vegetarian capsules", shares Manoj Chaturvedi, Director, BestSource Nutrition.

Flaxseed Oil with Tocopherol capsules (500mg) by BestSource Nutrition is:

- Best for Heart, Skin, Hair and Joint health benefits
- Better Antioxidant support due to natural Vitamin E (tocopherol)
- Cold pressed, Solvent Free Flaxseed Oil
